

The hardware requirements for Sage SalesLogix v7.5.2 are a guideline only. Hardware requirements depend on the number of users, activity, size of database, number of records, Operating System, and RDBMS, among other factors.

The software requirements show all qualified software for use with Sage SalesLogix v7.5.2.

"v" indicates Qualified. Component tested for Version.Release shown.

"-" indicates Not Qualified. Component not tested for Version.Release shown.

Customers with active Maintenance & Support agreements may contact Technical Support if their environment includes components that have not been qualified. However, troubleshooting will be limited and no fixes related to the non-qualified component will be available.

Note that Sage generally does not perform additional qualification testing on a released version of SalesLogix with newer service packs for operating systems and applications.

## System Requirements

# Sage SalesLogix

	v7.0	v7.2	v7.5	v7.5.1	v7.5.2
<b>Windows Client</b>					
<b>Hardware</b>					
Minimum memory/Recommended memory (MB)	256/512+	256/512+	256/512+	256/512+	256/512+
Minimum processor/Recommended processor (MHz)	800/1GHz+	800/1GHz+	800/1GHz+	800/1GHz+	800/1GHz+
Free disk space for application files (MB)	200+	200+	200+	200+	200+
<i>Remote Client requires minimum additional 250+ MB free disk space for database and sync files (Depends on subscription rules and account ownership which increase size of database)</i>

<p><i>Oracle Client/OLE DB Provider Compatibility: Oracle Client software is a required component to be installed on each machine making a connection to a Sage SalesLogix Oracle database. Though the Oracle client software may be cross-compatible between versions, it is assumed that, when possible, the installed Oracle client software match the Oracle server version. If the Oracle OLEDB Provider DOES NOT match the major release version of the database software, it is assumed that the OLEDB components will be the latest available from the vendor.</i></p>

Sage SalesLogix for Web Phones includes HDML and WML templates for US and international customers. The templates have been qualified with the Openwave browser and platform. Additional carriers and phones may be compatible and may be qualified in the future.

Openwave-compatible phones are listed at: [http://upmkt.openwave.com/dev\\_phones/phones.cfm](http://upmkt.openwave.com/dev_phones/phones.cfm) Openwave

Compatible carriers are listed at: [http://upmkt.openwave.com/dev\\_carriers/carriers.cfm](http://upmkt.openwave.com/dev_carriers/carriers.cfm)

### Notes

1. .NET Framework is required if hosting a portal e.g. remote client.
2. Active Mail features not available.
3. IIS must run in v6 mode.
4. Windows 2008 support requires workaround, not available out-of-the-box.
